

HS2-SFE

Filter Housing

Sanitary, Inline, Single Cartridge, 316L Stainless Steel

This versatile, sanitary design filter housing is used for the clarification, sterilization, and high-purity filtration of liquids and gases. The small flow housing provides high reliability and security for continuous or point-of-use service, as well as for small batch processing applications.

Design Features

- Accepts one 2.5" or 5" length cartridge filter
- Flow rates to 5 gpm for liquids, or 70 scfm for gases
- Electropolished 316L stainless steel construction provides maximum durability and corrosion resistance
- Quick-release clamp closure allows easy disassembly and fast cartridge filter replacement
- Effective in sterile or high purity filtration of bulk gases, fermentor gases or tank venting
- Smooth, ultraclean surface finish enhances cleanability
- True sanitary design prevents entrapment or build-up of contaminants
- Inline-type flow configuration reduces housing pressure loss
- Thermal jacketed bowl available for steam or coolant circulation
- Sanitary vent and drain valves permit easy venting, draining, sampling or integrity testing operations

Water Flow Rates*

Air Flow Rates*

*Graphs are valid for 2.5" and 5" housings.

Specifications

Materials of Construction

Head & Bowl: 316L stainless steel
 Cast Clamp: 304 stainless steel
 Closure O-ring: Silicone standard*
 Valve Seal Tip: Teflon®
 Valve O-ring: Silicone standard*
 *Buna, EPR, Viton® and Teflon® optional

Surface Finish

Wetted surfaces are polished to ≤ 25-μin Ra finish. Exterior surfaces are polished to buffed-mirror finish. All surfaces are electropolished.

Service Ratings

Liquid: 250 psig @ 70°F (17 bar @ 21°C)
 Air/gas: 125 psig @ 70°F (9 bar @ 21°C)

Connections

Inlet/Outlet: 1.5 sanitary flange (SF)
 Jacket Ports: 1/4 NPT or 1/2 SF
 Vent/Drain Valve: 1/4 hose barb standard

Cartridge Length (Nominal)

2.5 or 5 (63.5 mm or 127 mm)

Cartridge Connections

Accepts single-open-ended (SOE) cartridge filter having a 2.25 outer diameter and fitted with an internal, -116 O-ring style adapter. The

cartridge filter is secured in place when the housing is fully assembled.

Sterilization

The housing can be inline steam sterilized, autoclaved or hot water sanitized.

Mounting

The housing can be mounted and supported on suitably braced, rigid, inline pipe connections.

Options

In addition to our standard housings, Meissner Filtration Products, Inc. designs and manufactures specially engineered filter housings to meet unique design or process requirements. Variations include, but are not limited to: custom surface finishes to 10-μin Ra, custom connections such as RF flange or other special fittings, custom vent and drain placements, as well as gauge ports. If you need a housing with a unique combination of features, Meissner will custom engineer it to meet your specific requirements. Contact us for more details.

Safety

Each Meissner housing is individually inspected, tested and serialized to ensure the highest quality and safety.
